Sequence 1, Application US/08110691A

Patent No. 5795714

CENERAL INFORMATION:

APPLICANT: CANTOX, Charles, R.
APPLICANT: PRZETAKIEWICZ, Mark

TITLE OF INVENTION: A METHOD FOR REPLICATING AN

TITLE OF INVENTION: ARRAY OF NUCLEIC ACID PROBES(as amended)

NUMBER OF SEQUENCES: 48

CORRESPONDENCE ADDRESS:
ADDRESSEE: Baker & Botts, LLP

STREET: 1299 Pennsylvania Avenue, NW

CITY: Washington
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Score 11.4; DB 1; Length 15; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Roco, Pam

APPLICANT: Bacobedo, Jim

APPLICANT: Schobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION NUMBER: US/09/371,772B

CURRENT FILING DATE: 1995-10-26

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOUTHWARE: PATENTING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

Sequence 5241, Application US/09371772B

Sequence 5241, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
Pave No. Fibozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Bave No. Pam
APPLICANT: Bescobedo, Jaine
APPLICANT: Escobedo, Jaine
APPLICANT: MENBON 96-J (237/198)
TITLE OF INVENTION: MENBON 96-J (237/198)
FILE REFERENCE: MENBON 96-J (237/198)
CURRENT FILING DATE: 1999-08-10

PRIOR APPLICATION NUMBER: US 60/005, 974

PRIOR APPLICATION NUMBER: US 68/584,040

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0

SEQ ID NO 5241

LENOTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         US-09-371-772B-5297

Patent No. 6623962

GENERAL INFORMATION:

APPLICANT: Akhtar, Saghir

APPLICANT: Rell, Patricia

APPLICANT: McSwiggen, James

TITLE OF INVENTION: ENZYMACE ACID TREATMENT:

TITLE OF INVENTION: OF DISEASES OR CONDITIONS RELATED

TITLE OF INVENTION: TO LEVELS OF EPIDERMAL GROWTH

TITLE OF INVENTION: PACTOR RECEPTORS

NUMBER OF SEQUENCES:

ADDRESSEE: Lyon & Lyon

ADDRESSEE: Lyon & Lyon

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 542, Application US/08373124A

Sequence 542, Application US/08373124A

Patent No. 5646042

GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Darder, Kenneth
APPLICANT: McSwiggen, James
APPLICANT: Jarvis, Thale
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR
TITLE OF INVENTION: TREATMENT OF RESTENCISS AND
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                         MEDIUM TYPE: storage

Sequence 1585, Application US/08373124A

Patent No. 5646042

GENERAL INFORMATION:

APPLICANT: Stinctocmb, Dan T.

APPLICANT: McSwiggen, James

APPLICANT: Jarvis, Thale

TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR

TITLE OF INVENTION: TREATMENT OF RESTENCIS

TITLE OF INVENTION: CANCER USING RIBOZYMES

NUMBER OF SEQUENCES: 2627

CORRESPONDENCE ADDRESS:

ADDRESSEE: Lyon & Lyon

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  US-08-757-024-406/C
US-08-757-024-406/C
Sequence Application US/08757024
Patent No. 602539
GENRRAL INFORMATION:
GENRRAL INFORMATION:
TITLE OF INVENTION: METHOD OF TREATMENT FOR ASTHMA
NUMBER OF SEQUENCES:
CORRESPONDENCE:
STREET: P.O. Drawer 34009
CITY: Charlotte
STATE: No. 6025339th Carolina
COUNTRY: USA
ZIF: 28234
COMPUTER: ENDABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATIOR SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PATENTIN Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/757,024
FILING DATE: 26-NOV-1996
CLASSIFICATION: 514
ATTORNEY/AGENT INFORMATION:
REGISTRATION: MUMBER: 31,665
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              REFERENCE DOCKET NUMBER: 5218-41

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-09-49-645A-32/c

Sequence 32, Application US/09479645A

Patent No. 6489141

GENERAL INFORMATION:
APPLICANT: EAGL.
APPLICANT: ZHOU, Jian
TILLE OF INVENTION: NUCLEIC ACID SEQUENCE AND METHOD FOR SELECTIVELY
TILLE OF INVENTION: NUCLEIC ACID SEQUENCE AND METHOD FOR SELECTIVELY
TILLE OF INVENTION: DO101/10S

TILLE REPERENCE: 21033 0001/10S

CURRENT APPLICATION NUMBER: US/09/479,645A

CURRENT FILING DATE: 1998-0-0-07

PRIOR FILING DATE: 1998-0-0-09

PRIOR FILING DATE: 1998-0-0-11

PRIOR FILING DATE: 1997-09-11

NUMBER OF SEQ ID NOS: 219

SOFTWARE: PATENTION NUMBER: AU PO9467

PRIOR FILING DATE: 1997-09-11

NUMBER OF SEQ ID NOS: 219

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 6889, Application US/09371772B

Patent No. 656127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Bacobedo, Jaim

APPLICANT: Stinncomb, Dan

APPLICANT: Escobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF ILING DATE: 1999-08-10

CURRENT APPLICATION NUMBER: US/09/371,772B

CURRENT FILING DATE: 1999-08-10

PRIOR FILING DATE: 1999-10-26

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1995-10-26

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PATENTIN VARIEN: US 08/584,040

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PATENTIN VARIEN: US 08/584,040
